

Spring soft wheat

ARABELLA

Rusticity and forage

ARABELLA

ARABELLA, is a non-awned wheat, semi-early, with good health and resistant to lodging in spite of their height.

ARABELLA is very right wheat for dry areas, due to their hardiness.

ARABELLA is very suitable for its use for forage production.

CULTIVATION AREA

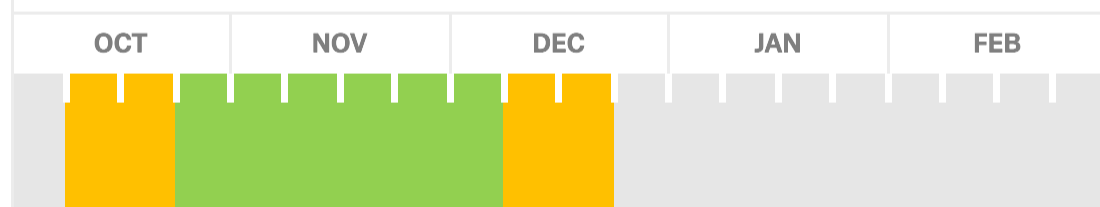

EAR

Awnless

Planting time

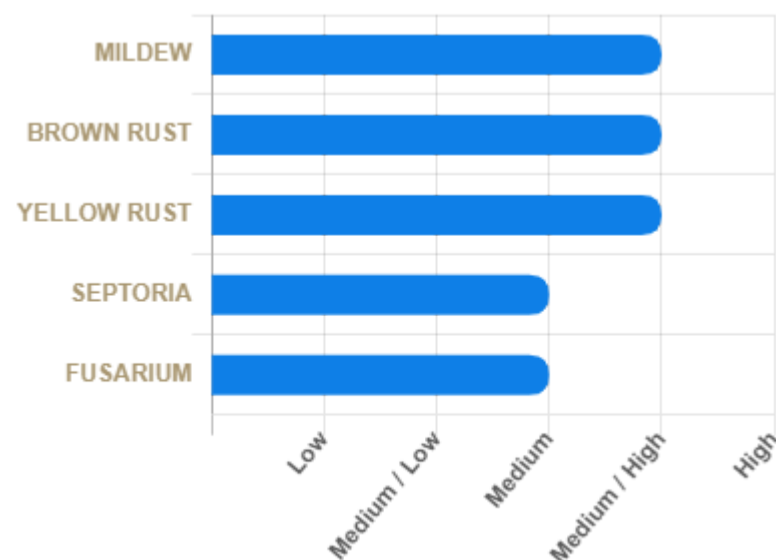

Sowing Density

190 to 260 kg/ha

AGRONOMIC CHARACTERISTICS

CYCLE	Alternative
PRECOCITY	Semi-early
CHLORTOLURON	Sensible
RIPENING	Very high
QUALITY	Superior Bread Wheat

DISEASE RESISTANCE
