

Winter soft wheat IDALGO

Early and productive

IDALGO

IDALGO is an awned winter wheat, **very early**, which make it very suitable where there should be dry periods at the end of the growing cycle.

IDALGO has **excellent productivity** and very good bread milling quality due to its **extensibility**.

IDALGO, a combination of hardiness in the field and quality of the grain.

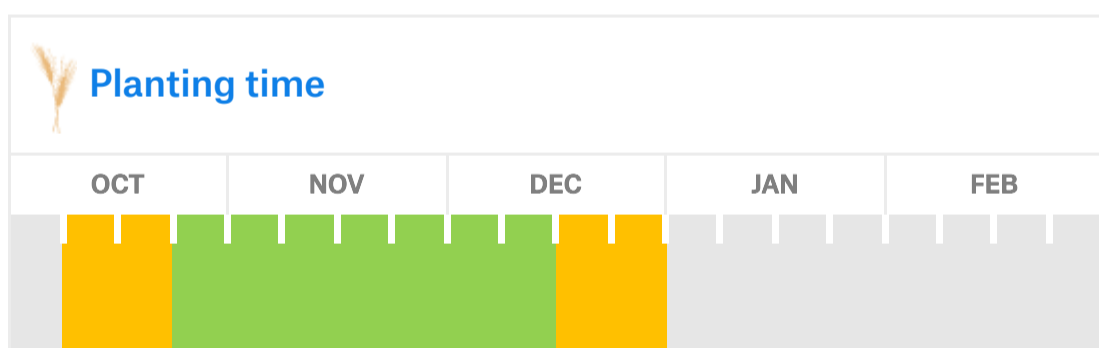

CULTIVATION AREA

EAR

Awned

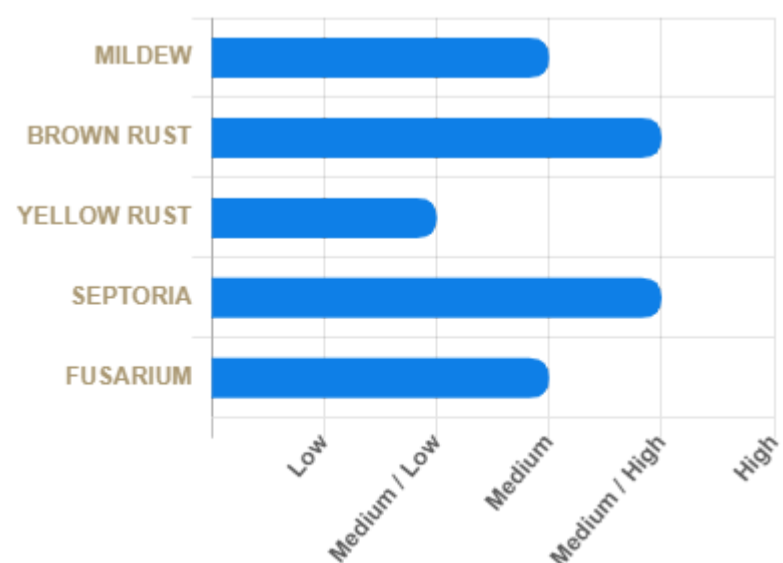

Sowing Density

180 to 250
kg/ha

AGRONOMIC CHARACTERISTICS

CYCLE	Winter
PRECOCITY	Very early
CHLORTOLURON	Tolerant
RIPENING	Medium
QUALITY	Extensible

DISEASE RESISTANCE
