

Spring soft wheat

MERCURIUS

New!

Veni, vidi, vici

MERCURIUS

MERCURIUS is synonymous of **high yields in spring wheat**.

MERCURIUS was registered in 2019 with a **production of 110%** over control varieties, beating to them in each one of the several trials done in the agronomic validation phase.

MERCURIUS, the most productive spring wheat variety in GENVCE 2020 and GENVCE 2021.

(): GENVCE is the Spanish association that manage the official trials for new cereal varieties*

GROWING AREA

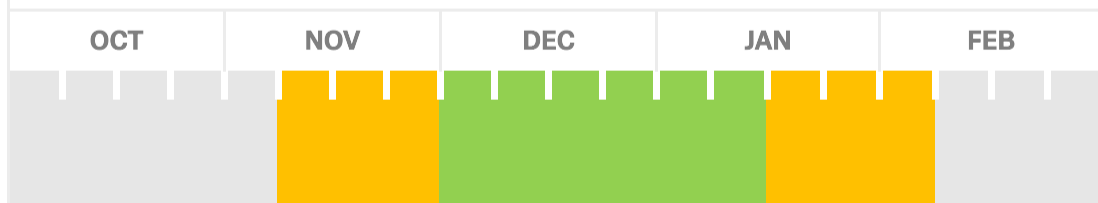

EAR

Awned

Sowing period

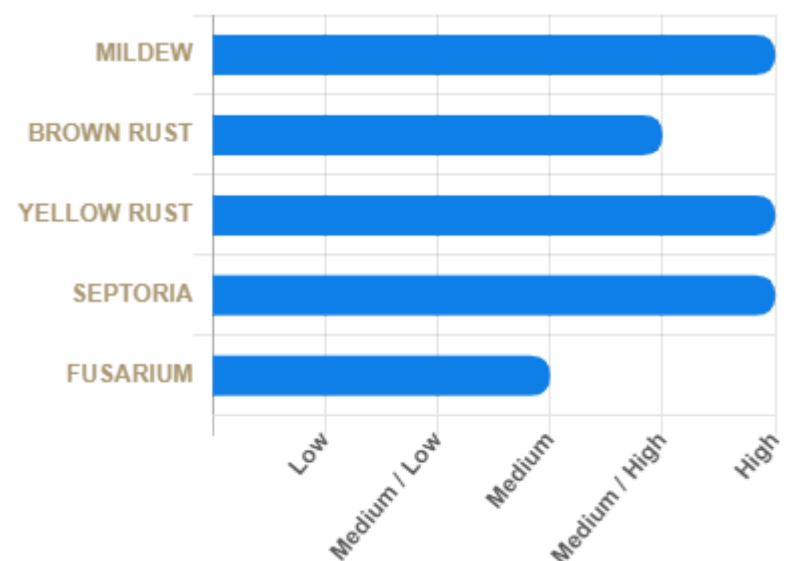

Sowing density

200 to 240 kg/ha

AGRONOMIC FEATURES

CYCLE	Spring
EARLINESS	Very early
CHLORTOLURON	Sensible
STRAW HEIGHT	Medium
QUALITY	Bread Wheat

DISEASES RESISTANCE
