

The leading soybean for potential and productive stability

## AVRIL

AVRIL is a **cycle 1** soybean, adapted to sowing both in the first and second early harvest.

AVRIL is of medium size, with a very good ability to branch. It has EXCELLENT RESISTANCE to LIDING.

AVRIL has a HIGH INSERTION of the FIRST SHEATH and GOOD RESISTANCE to DEHISCENCE.

### CULTIVATION AREA

### GRAIN COLOR

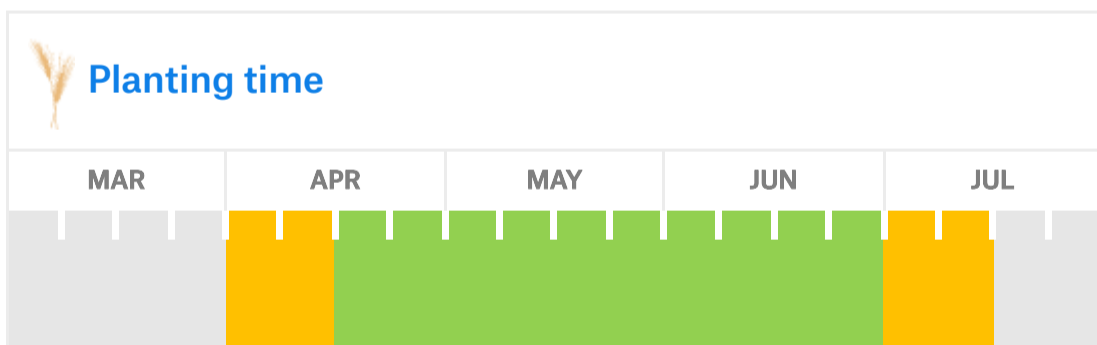

Yellow

### AVRIL, the MOST PRODUCTIVE variety:

- In Italy, official ERSA trials - 18 locations and 3 years '18, '19 and '20.
- In the Ebro Valley - DGA Tests.

Sowing Density

450,000 to 500,000 seeds/ha

## AGRONOMIC CHARACTERISTICS

RIPENING	Medium
THOUSAND SEEDS WEIGHT	180/200 gr.
THREAD COLOR	Brown
PROTEIN CONTENT	Medium - High
