

Yellow oat

PREVISION

Hardiness and forage

PREVISION

PREVISION is a very early **yellow oat**. Is the reference oat for its adaptation to the poor land and semi-dry areas.

PREVISION, due to their stems that are thinner than other oats, produce a **forage of very high quality**, very valued by farmers.

PREVISION, a good choice due to:

- Their hardiness
- Their earliness
- Their forage quality

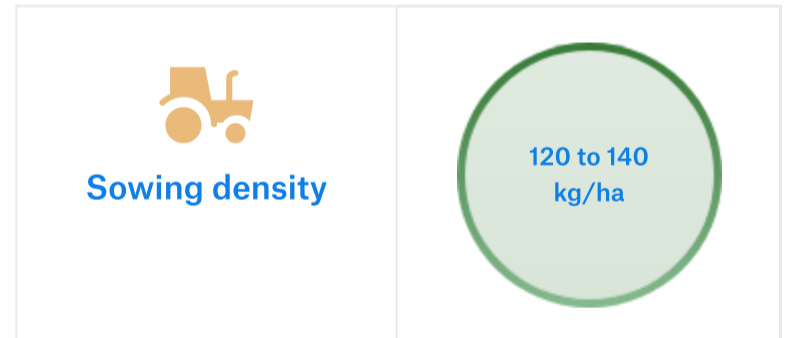

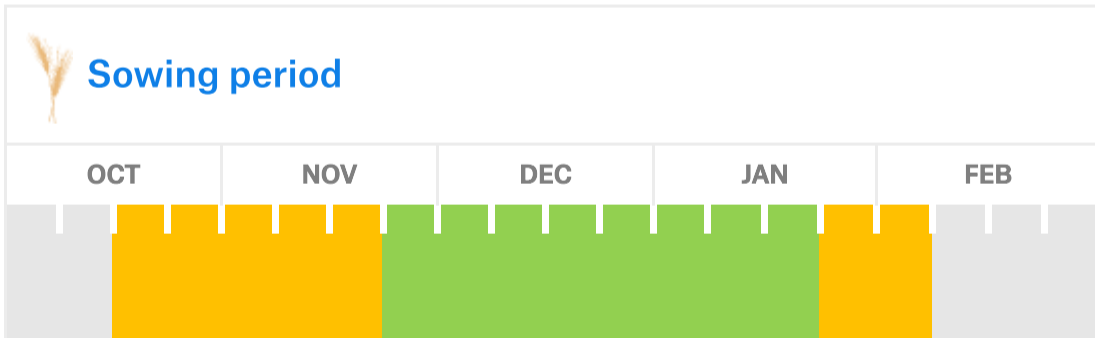

GROWING AREA

GRAIN COLOR

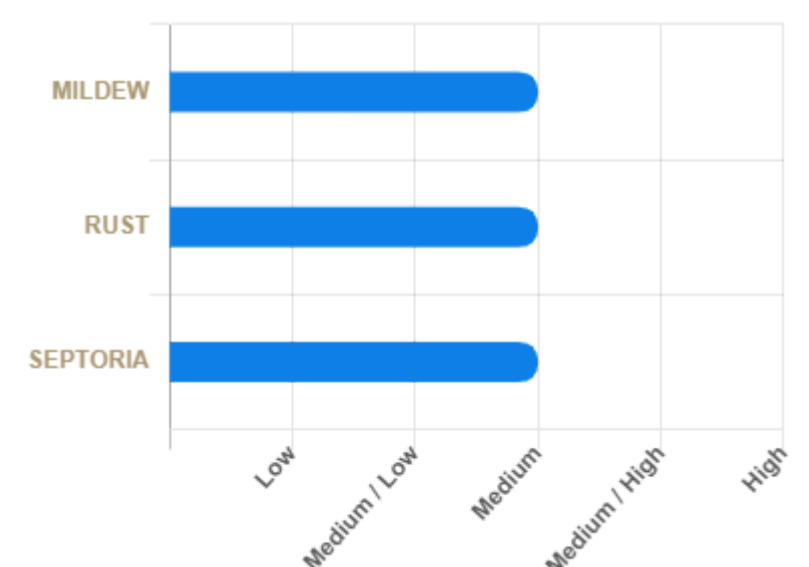

Yellow

AGRONOMIC FEATURES

CYCLE	Spring
EARLINESS	Very early
STRAW HEIGHT	Medium / High
LODGING RESISTANCE	Medium
APTITUDE	Grain - Forage

DISEASES RESISTANCE
