

Hybrid Rye

HELLTOP

A powerful rye

HELLTOP

HELLTOP is an hybrid rye which has adapted and consolidated perfectly to all the areas of cultivation, whether for grain or fodder production.

HELLTOP has a quality grain, good sized.

HELLTOP has good diseases tolerance and excellent productivity.

HELLTOP, who sows it ... REPEATS!

Productivity, health and resistance to lodging are its strengths.

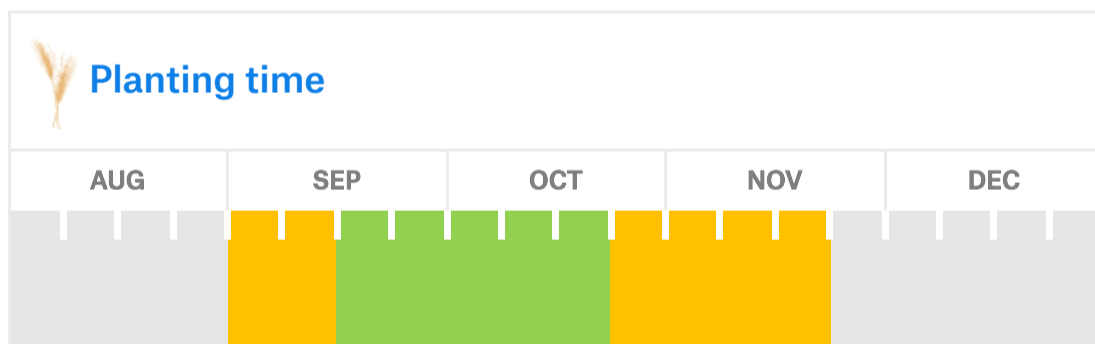

CULTIVATION AREA

PRECOCITY

Medium

Sowing Density

60 to 70 kg/ha

AGRONOMIC CHARACTERISTICS

CYCLE	Winter
RIPENING	High
APTITUDE	Grain - Forage
TYPE	Hibrid

DISEASE RESISTANCE
